

MALIK KHELFAH

Full Stack Developer

Amman, Jordan • 0792554445 • Malik.khelfah.it@gmail.com • [LinkedIn](#) • [malikk.xyz](#) • [github.com/wmalikkh](#)

PROFESSIONAL SUMMARY

Full Stack Developer with production experience across Python/Flask, FastAPI, and Flutter, plus cloud infrastructure (AWS, Hetzner). Solo-designed and rebuilt Dar Alfeneq ([alfeneq.com](#)), a bilingual (EN/AR) e-commerce platform for a live publishing business — re-platforming an earlier prototype end-to-end onto a new backend, new frontend, and new infrastructure. Currently architecting a full ERP system (inventory, POS/invoicing, job cards, role-based reporting) for a live car parts and service business. Background in SOC monitoring, penetration testing, and network security, backed by hands-on IT infrastructure training in Windows Server, Hyper-V, and enterprise backup systems. Owns projects end-to-end, from system design through live deployment.

TECHNICAL SKILLS

Languages: Python, JavaScript, Dart, HTML, CSS, SQL, Java, C++

Frameworks & Tools: Flask, FastAPI, Flutter, REST APIs, Git, Render, Hetzner Cloud

Cloud & Infrastructure: AWS (KMS, IAM, EC2), Google Authentication / OAuth, cloud security, network maintenance

Security: AES-128, 3DES, SOC Monitoring, Penetration Testing, Incident Response, GRC

Networking: DNS, TCP/IP, network security, Wireshark, Nmap, Kali Linux, Splunk

Hardware: PC building & repair, component diagnostics, Arduino, PCB Design, QMK Firmware, NFC/QR systems

Other: Embedded Systems, Chrome Extension development, UI/UX design

PROJECTS

Dar Alfeneq | *Full Stack Developer (Solo)* [FastAPI · Python 3.12 · Flutter (Web) · SQLite · OAuth] [alfeneq.com ↗](#)

- Complete ground-up rebuild: re-platformed an earlier single-language Flask/HTML prototype into a production bilingual (EN/AR) e-commerce system on entirely new backend (FastAPI), frontend (Flutter), and infrastructure
- Built a custom localization system and content-picker pattern powering every page, label, and piece of content in both English and Arabic, including full RTL layout support
- **Inventory:** designed a book catalog with SKU tracking, stock/quantity, weight, and page count, plus Excel bulk import/export — enabling the non-technical business owner to manage the full catalog independently
- **Admin panel:** built a tabbed admin interface (Books/Authors/Categories) with Arabic-language search, animated loading states, and review moderation
- **Auth & security:** implemented role-based access (admin/customer), password reset, email verification, and Google Sign-In (OAuth); hardened with environment-based secrets management ahead of public launch
- **E-commerce core:** built the checkout/order flow, category management, and bilingual content pages (About, Contact, Privacy Policy, Terms) wired with real production business data
- **Engineering practices:** designed a relational schema with coordinated migrations, wrote a FastAPI TestClient suite using lifespan-based DB seeding, and ran a cross-platform workflow — developing/validating Flutter/Dart on Linux, building and testing final releases on Windows

StegLens | *Full Stack Developer* [Python · Flask · HTML/CSS/JS · AES-128] [GitHub ↗](#)

- Built a secure web app for concealed data exchange using steganography
- Integrated Python encryption scripts with a Flask REST API and responsive frontend
- Implemented AES-128 and 3DES encryption with custom steganography algorithms
- Deployed live on Render

MacroFlow | *Lead Engineer & Developer* [C++ · Python · QMK · PCB Design] [macroflow.info ↗](#)

- Engineered a commercial macropad product from prototype to market release
- Designed custom PCB and C++ firmware compliant with QMK standards
- Built a Python desktop app for real-time hardware-to-OS interaction

PROFESSIONAL EXPERIENCE

IT Infrastructure Trainee — *Kaizen 365 — Amman, Jordan* Mar 2026 – May 2026

- Completed an 8-week field training across the IT infrastructure department, working in cloud, server administration, and virtualization environments
- Configured and maintained networking, backup, and recovery systems in a live production environment
- Provided IT helpdesk support, diagnosing and resolving end-user hardware and software issues

Cybersecurity Intern — *IT Security C&T — Amman, Jordan* Jun 2025 – Sep 2025

- Conducted SOC monitoring and network defense operations
- Performed ethical hacking and vulnerability assessments
- Gained hands-on experience in Digital Forensics and GRC

Customer Support Representative — *CRYSTEL — Amman, Jordan* Feb 2022 – Jun 2022

Managed high-volume customer inquiries in a fast-paced call center environment, developing crisis management and problem-solving skills under pressure.

PC Technician — *Saqer — Amman, Jordan* 2021 – 2022

Diagnosed and repaired hardware faults across desktops and laptops (motherboards, GPUs, RAM, storage), handling multiple client devices in a fast-paced workshop environment.

CERTIFICATIONS

- **IBM Full Stack Software Developer — Professional Certificate (15 courses)** — IBM / Coursera, Jul 2026 [Verify](#)
- **Google IT Support — Professional Certificate (6 courses)** — Google / Coursera, Jul 2026 [Verify](#)

EDUCATION

B.Sc. Cybersecurity & Cloud Computing — *Applied Science Private University — Amman, Jordan* Sep 2021 – Jan 2026

- Completed hands-on programming labs in Python, Java, SQL, C++, and Data Structures
- Completed coursework in Penetration Testing, Mobile Application Security, and Blockchain Security
- Completed coursework in Digital Forensics and Introduction to Machine Learning
- Participated in multiple Capture The Flag (CTF) competitions
- Completed network security and network maintenance lab coursework
- Completed cloud security and cloud infrastructure labs using Amazon Web Services (AWS)
